

Timestamp	Your name	Your email address	Are you familiar with programming?	How many times have you encountered the requirement of programming while working?	What did you do when you encountered the need for programming?	How helpful do you think a tool that will generate code from your instructions in English prove to be?	How many programming languages have you worked with?	Which programming languages do you use frequently for developing applications/systems?	Generally how long does it take for you to feel comfortable with a new programming language for you?	How troublesome is learning a new programming language for you?	How useful do you think a tool that can generate code from natural language prove to be?	Are you familiar with the concepts of blockchain?	In which of the fields of blockchain, do you think you have in-depth knowledge?	In how many languages can you write smart contracts?	Which block languages do you normally use to develop smart contracts?	What are the problems that you have faced while writing smart contracts?	How important do you think a tool that can generate smart contract code from natural language prove to be?	Have you heard of Model-Driven Engineering?	Were you able to generate the smart contract given in the last case?	The interaction with the chatbot was clear and understandable	I have the resources necessary to use the chatbot	The chatbot is compatible with other platforms I use	How many times did you have to refer to the tutorial while interacting with the chatbot?	What do you have to say about the amount of information that had to be typed for generating the code?	How many times did the chatbot respond in the wrong way?	How would you rate the interest instilled in the chatbot?	What were the reasons behind the chat being boring?	How useful do you think the chatbot is?	How good was the chatbot in giving some good advice on your experience of the working of smart contracts and Constractible gave a lot of clarity about smart contracts	How likely is it that you are going to use the chatbot in the future?	On a scale of 10, how good was your overall experience with the chatbot?	Anything else that you would like to comment about your experience with the chatbot	Any suggestions to improve the chatbot
